ABOUT ME

I am a dedicated physicist specializing in material science with strong expertise in experimental and computational research. My work bridges physics, chemistry, and materials engineering, focusing on the design and development of advanced functional materials for energy and environmental applications. Alongside my research, I am equally passionate about academic mentorship and collaborative teaching, fostering inclusive and engaging learning environments. My long-term goal is to advance impactful research while contributing to the training of the next generation of scientists through a balance of innovation, education, and collaboration.

EDUCATION

/Year of Completion

➤ Research Scientific Staff

2025- Present

Electro-Catalysis Laboratory, School of Chemistry, Indian Institute of Science Education and Research Thiruvananthapuram (IISER TVM), Thiruvananthapuram-695551. Kerala, India.

Specialization: Oxygen Evolution Reaction (OER), Oxygen Reduction Reaction (ORR), and Hydrogen Evolution Reaction (HER) in metals/metal oxides, perovskite materials, and carbon-based catalysts.

Area of Exposure: In my current role, I have gained extensive exposure to both experimental and computational aspects of electrocatalysis. My work focuses on designing and evaluating catalysts for OER, ORR, and HER, particularly in metal oxides, metals, perovskites, and carbon-based materials. I bring hands-on expertise in catalyst synthesis, electrochemical testing, and advanced material characterization techniques, while also integrating computational modeling to deepen mechanistic insights. I am proficient in density functional theory (DFT) simulations using **Gaussian, Quantum ESPRESSO, Advanced Nano-labo, and Materials Studio software**, which allows me to correlate electronic structure with catalytic performance. This combined physics–chemistry approach enables me to bridge experimental observations with theoretical analysis, providing a comprehensive understanding of catalytic processes.

➤ **Post Doctoral Fellow**

2023- 2025

Department of Nanosciene, Center for Nano and Material Sciences, Jain (Deemed-to-be) University, Jain Global Campus, Ramanagaram-562112, Karnataka, India.

Specialization: Electrocatalysis, CO₂ Utilization, Reduction, and fixation, Hydrogen Evaluation Reaction (HER), Oxygen Evolution Reaction (OER), CO₂ conversion into value-added products.

Area of Exposure: In my professional journey, I have garnered extensive exposure to a variety of sophisticated scientific instruments and techniques. My hands-on experience includes operating the CH instrument, rotary evaporator, and advanced characterization tools such as Zeta potential and Dynamic Light Scattering (DLS). I have also honed my skills in the electrospinning process, which is crucial for fabricating nanofibers.

My research, which specializes in electrocatalysis, focuses on the utilization, reduction, and fixation of CO₂. I am proficient in the Hydrogen Evolution Reaction (HER) and Oxygen Evolution Reaction (OER) processes, key components in the production of sustainable energy. Additionally, I have dedicated significant effort to converting CO₂ into value-added products, aiming to mitigate environmental impact while contributing to the development of green technologies.

Instruments Handled: CH instrument, rotary evaporator, Zeta potential, Dynamic light scattering (DLS), Electrospinning.

➤ **Ph.D., Physics (Material Science)**

2023

Karpagam University, Coimbatore-641021, Tamil Nadu, India.

Dissertation Title: Synthesis and Comparative Study of Aluminium and Copper Doped Barium Hexaferrite/ Cobalt Zinc Ferrite Nanocomposite Materials for Memory Device and Filter Applications

Specialization: Physics (Material Science).

Research Methodology: Sol-Gel Auto combustion, Sol-gel Citrate method, Physical Mixing method, Ball milling Method.

Analysis Techniques Employed: XRD: X-ray Diffraction, FTIR: Fourier Transform Infrared Spectroscopy, SEM: Scanning Electron Microscopy, EDAX: Energy Dispersive X-ray Spectroscopy, UV: Ultraviolet, PL: Photoluminescence, Raman: Raman Spectroscopy, Dielectric Studies, VSM: Vibrating Sample Magnetometer.

Areas of Exposure: Material Science namely, metals and composites, powders, Nanocomposites, Ferrites, Oxide materials, Magnetic materials, Thin Films, sintering, processing, mechanical alloying, phases and microstructures characterization, Physical properties testing and characterization, heat treatments etc.

Thesis Overview: My research advanced material science, focusing on applications in memory devices and filter technologies. I observed a significant correlation between dopant concentration, microstructure, and magnetic performance. Precise control over dopant levels was found to influence magnetic properties, suggesting tailored applications in nanoscale magnetic devices. This study provides critical insights into designing, synthesizing, and characterizing advanced nanocomposite materials for next- generation memory devices and high-performance filters, enhancing our understanding of nanoscale magnetic systems and their practical applications in material science.

Internal Ph.D. Supervisor: Dr. E. Sivasenthil, Associate Professor, Advance Functional and Energy Materials Laboratory, Department of Physics, Karpagam University, Coimbatore, 641 021, Tamil Nadu, India.

External Expert Member: Dr. S. Arumugam, Vice Chancellor, Tamil Nadu Open University, Chennai - 600015, Tamil Nadu, India.

➤ **M.Sc., Physics: 95.4 % (First Class with Distinction)**

2019

Karpagam University, Coimbatore-641021, Tamil Nadu, India.

Dissertation Title: Quantitatively probing magnetic nanostructures ZnFe_2O_4 with superior spatial resolution.

Project Institution: Indira Gandhi Center for Atomic Research (IGCAR), Department of Atomic Energy (DAE), Kalpakkam, Tamil Nadu, India.

Specialization: Physics (Material Science), Nanomaterials

Thesis Overview:

In my MSc thesis, I focused on the quantitative analysis of magnetic nanostructures, specifically ZnFe_2O_4 , emphasizing achieving superior spatial resolution. The key findings and conclusions of my research are as follows:

- I successfully synthesized phase-pure spinel nanostructured ZnFe_2O_4 using a co-precipitation method. This synthesis method ensured the desired phase and crystalline purity of the material.
- Comprehensive characterization techniques, including Raman spectroscopy and X-ray diffraction (XRD), confirmed the phase and crystalline purity of the ZnFe_2O_4 nanostructures.
- Microstructural analysis through scanning electron microscopy (SEM) and atomic force microscopy (AFM) revealed the smallest grain size, approximately 20 nm, which is crucial for understanding the material's properties at the nanoscale.
- Magnetic Force Microscopy (MFM) imaging unveiled the presence of very tiny magnetic domains, approximately 30 nm in size, within the ZnFe_2O_4 nanostructures. These images also showed variations in brightness, indicating differences in shape, size, and orientation of the nanostructures.
- A noteworthy observation was the relationship between magnetic domain intensity and grain size. As grain size increased, magnetic domain intensity increased and then decreased beyond a certain threshold.
- For grain sizes below 20 nm, MFM imaging exhibited significant diffusion of the phase signal, providing direct evidence of super-paramagnetism in the nanostructured ZnFe_2O_4 .
- The results of this research demonstrate the significant impact of particle size on the magnetic properties of magnetic materials. This finding has promising implications for developing novel magnetic materials for nanomagnetic devices. Importantly, this work opens up the possibility of directly and quantitatively probing the weak magnetic stray fields emanating from nanoscale magnetic systems with unparalleled spatial resolution.

Areas of exposure: Nuclear physics, Nanomaterial characterization and sensors, Surface Nanoscale examination, Material science.

➤ **B.Sc., Physics: 87.4 % - (First Class with Distinction)** ----- **2017**

Karpagam University, Coimbatore-641021, Tamil Nadu, India.

Dissertation Title: Theoretical Study on Gravitational waves and LIGO (Laser Interferometer Gravitational Wave Observatory) as an Observatory

➤ **Higher Secondary (XII standard): 86.33 %** ----- **2014**

Hindusthan Matric Higher Secondary School, Coimbatore, Tamil Nadu, India

Subjects: Computer Science, Physics, Chemistry, Mathematics, Tamil, and English.

Board of Studies: State Board of Tamil Nadu

➤ **Secondary School (X standard): 89 %** ----- **2012**

Adwaith G.N.S Matric Higher Secondary School, Coimbatore, Tamil Nadu, India.

Subjects: Physics, Chemistry, Mathematics, Biology, Tamil, and English.

Board of Studies: State Board of Tamil Nadu.

INTERNSHIP & TRAINING

/Duration

➤ Mendeley Training Course

14/06/2020

Siva Institute of Pharmacy, Bilaspur, India.

Job position/Title: Trainee

Description: Mastering reference management and research workflow. Topics included software introduction, citation organization, and collaboration strategies. Acquired practical skills in document annotation and seamless citation insertion. Enhanced productivity and research efficiency through effective Mendeley utilization.

➤ M.Sc Final Year project Trainee

SEP 2018 to APR 2019

Indira Gandhi Center for Atomic Research (IGCAR), Department of Atomic Energy (DAE), Kalpakkam, Tamil Nadu, India

Job position/Title: Project/ Research Intern

Description: Conducted research on ZnFe_2O_4 as part of M.Sc., project in collaboration with Karpagam University and IGCAR, TN, India and developed training through hands-on experimentation and data analysis via Scanning Probe Microscope (SPM) - (Atomic & Magnetic Force Microscopy (AFM & MFM))

➤ Summer Training Internship for Physics and Chemistry (STIPAC)

APR 2018 to JULY 2019

Indira Gandhi Center for Atomic Research (IGCAR), Department of Atomic Energy (DAE), Kalpakkam, Tamil Nadu, India

Job position/Title: Research Intern

Description: Conducted research entitled, “Nanoscale study of nanocomposite of $\text{BaTiO}_3 \times \text{ZnFe}_2\text{O}_4$ ” and exposed areas including Nuclear Physics, Nuclear power plant, Material Science, Nanomaterials, quantum optics, MEMS & NEMS.

4	Emerging Research Advances & Trends in Intelligent Knowledge Engineering Systems	Sri Sai Ram Institute of Technology (Autonomous), Chennai	30.09.2021 to 06.10.2021	Six Days International Level FDP/ Indian Society for Technical Education (ISTE)

5	Future of Examinations: Bloom's Taxonomy and Multiple Assessment Tools	GTN Arts College (Autonomous), Dindigul	21.07.2020 to 23.07.2020	3 Days National Level FDP - Faculty Enrichment Program/ GTN Arts College (Autonomous), Dindigul
---	--	---	--------------------------	---

ONLINE COURSES & CERTIFICATION

S.No.	Course Title	Learning Platform	Instructor	Period
1	Finite Element Analysis Convergence and Mesh Independence	Coursera	Jousef Murad, Mechanical Engineer, Coursera Instructor	20 June, 2025
2	Environmental Science	IEM-UEM Teaching Learning	Dr. Ruchira Mukherjee, University of Engineering and Management (UEM), Jaipur, India.	18 June, 2025
3	Material Science and Engineering	IEM-UEM Teaching Learning	Dr. G.S. Taki, Department of ECE, Institute of Engineering and Management (IEM), Kolkata, India.	17 June, 2025

WEBINAR

International:	✓ Attended: 30	National:	✓ Attended: 37
	✓ Presented 3		✓ Presented 10

BOOK PUBLICATIONS

S. No.	Title	Area/ Year	Publisher	ISBN No.
1	Basics of Major Synthesis and Characterization of Nanomaterials	Nanomaterials/ 2021	KDP Publishers	ISBN-13 : 979-8723281752
2	Fundamentals of Zeolites & Composites : Nanoscience and Nanotechnology	Nanoscience and Nanotechnology/ 2021	KDP Publishers	ISBN-13 : 979-8746228833
3	Chemistry behind Nanoscience & Nanotechnology	Nanochemistry/ 2021	KDP Publishers	ISBN-13: 979-8806630927

4	Basic Fundamentals of Graphene & Graphene sheets based Nanocomposites	Nanotechnology/ 2021	KDP Publishers	ASIN: B094T2NTV5
5	A Review on Mesoporous materials & their Nanocomposites	Nanoscience and Nanocomposites/ 2021	KDP Publishers	ASIN: B094SQSX1C
6	Briefing various Modeling techniques of polymer/ CNT Nanocomposites	Nanocomposite/ 2021	KDP Publishers	ASIN: B094R1RPDZ
7	Introduction to Cellulose, Hemicellulose & Lignin based Nanocomposites	Nanoscience and Nanocomposites/ 2021	KDP Publishers	ISBN-13: 979-8500770981
8	An Overview of CNT & their Nanocomposites	Nanoscience and Nanotechnology/ 2021	KDP Publishers	ASIN: B094S92NY5
9	Briefing Metal-Organic Frameworks (MOF) & its Composites	Material Science/ 2021	KDP Publishers	ASIN: B094T6B2G2

SKILLS

- ✓ Analytical skills: Analyzed experimental data to investigate the effects of ferroelectric and magnetic phase coupling in multi-phase ferroic composites using advanced spectroscopic and microscopy techniques.
- ✓ Critical thinking: Developed a new theoretical model to explain the coupling of ferromagnetic properties in multi-phase ferroic composites, providing new insights into the design of materials with enhanced multifunctional properties.
- ✓ Research skills: Conducted experiments to synthesize and characterize multi-phase ferroic composites with tailored compositions and microstructures to optimize their multifunctional properties for various applications.
- ✓ Technical skills: Proficient in using various laboratory equipment, including Thermal Vapour Evaporation Unit, UV, PL, FTIR spectroscopy, and advanced microscopy and spectroscopic

instruments like SPM-AFM configuration. Experienced in MAUD, FULLPROF, and Origin for data analysis and modeling.

- ✓ Communication skills: Published research articles in high-impact scientific journals and presented research findings at international physics, materials science, and engineering conferences.
- ✓ Collaboration and teamwork: Worked with researchers from diverse backgrounds, including physicists, materials scientists, and engineers, on interdisciplinary research projects related to multi-phase ferroic composites in IGCAR, Kalpakkam.
- ✓ Time management and organization: Managed multiple UG and PG research projects simultaneously, ensuring that experimental timelines were met and research results were presented promptly.
- ✓ Attention to detail: Conducted careful characterization of the microstructure and properties of multi-phase ferroic composites, ensuring high-quality research outcomes and accurate reporting of research results.
- ✓ Adaptability and flexibility: I adapted research protocols to new experimental conditions and troubleshoot as needed, ensuring successful outcomes in developing and characterizing multi-phase ferroic composites.
- ✓ Intellectual curiosity: Developed research questions and pursued innovative research directions in physics and materials science, leading to publications related to multi-phase ferroic composites.

MEMBERSHIP IN PROFESSIONAL SOCIETIES

S. No.	Name of the Society	Details of Membership	Remarks	Nature of Tech. Activities done through the society
1	International Association of Engineers (IAENG)	Lifetime Member	Member ID: 303443	Published two articles in IJRTE journal suggested by IAENG
2	National Institute For Technical Training & Skill Development (NITTSD)	Lifetime Member	Member ID: NITTSD/PROF ESSOR/58855	—
3	Institute For Engineering Research and Publication (IFERP)	Member	Member ID: PM47361890	Attended webinars suggested by IFERP
4	All India Council For Technical Skill Development (AICTSD)	Lifetime Member	Member ID: AICTSD/PROF ESSOR/72288	Attended webinars suggested by AICTSD
5	National Digital Library of India (NDLI) club	Executive student member	Executive member on behalf of the students of Karpagam Arts & Science College	Suggested ideas to Improve Library facilities and infrastructure

CO-CURRICULAR ACTIVITIES

- ✓ Participated in Entrepreneurship Awareness Camp (EAC) (2016) organized by DST-NIMAT and Department of Commerce, Karpagam University, Coimbatore, TN, India.

LANGUAGES KNOWN

- English
- Tamil
- Hindi

EXTRACURRICULAR ACTIVITIES

- ✓ Part of Guinness World Record participant creating a world record in the Criteria, Largest one day Art competition (2010).
- ✓ Participated in the Guinness Book of World Records and Limca Book of World Records in “World’s Longest Drawing” (2009).

WORK IN PROGRESS

- ✓ Writing journals related to Electrocatalysis, mainly focusing on HER, OER, and ORR systems.
- ✓ Writing journals related to Electrocatalysis, mainly focusing on CO₂ utilization, reduction, fixation, and conversion into value-added products.
- ✓ Writing journals related to Magnetic and optical properties of ferrites, metal oxides, composites, and thin films
- ✓ Writing research articles related to Topological Edge states in CNT in collaboration with Madurai Kamaraj University, Madurai, Tamil Nadu, India.
- ✓ Writing articles related to Core/shell BTO-ZFO in collaboration with the Indira Gandhi Centre for Atomic Research, Kalpakkam, Tamilnadu, India.
- ✓ Writing articles related to Si-doped magnetic materials in collaboration with Vel-Tech University, Chennai
- ✓ Writing articles related to transition doped materials for advanced antibacterial properties in collaboration with Al-NahrainUniversity and Mustansiriyah University, Al-NahrainUniversity, Baghdad, Iraq.
- ✓ Writing articles related to the influence of nanoparticles at different plasma jet treatment times and their optical properties with UV-Vis-NIR in collaboration with Minia University, El-Minia, Egypt.

- ✓ Writing articles related to the biological activity of MgO nanoparticle synthesis by plasma-assisted reduction method in collaboration with Assiut University, Assiut, Egypt
- ✓ Writing articles related to silver nanoparticles before and after radiation of alpha particles for skin cancer applications in collaboration with University of Baghdad, and Mustansiriyah University, Iraq.
